JACKSON'S SECOND CONFESSION.

The Execution is Postponed for a Short Time to Permit Judge Helm and the Governor to Communicate—The Latter Satisfied to Have the Hanging Proceed.

[By Associated Press to THE INDEPENDENT] NEWPORT, Ky, March 20. - Just one year and three weeks today since time writing letters. The scaffold is painted white and made a ghastly appearance. It was the purpose to have the execution shortly after 9 o'clock but at 9.15 it was announced that Jackson had made a full confession A delay then occurred to allow a telegram to be

came very impatient Governor Bradley him The sheriff ordered the men to answered the telegrams saying he would prepare for the scaffold not believe any statement made by Jack-

that they were dead

could not say that Walling was innocent This settled the fate of both, and the time for execution was fixed at 11 30. At

will say now, at the last moment of my life, that I was not there, and I am innocent Lackson has said as much, but but it seems it will not save me. I cannot say any more, I will say no more on the

in six minutes Walling died first. The are excusable for swearing falsely, then crowds impered about after their death how much more excusable, and how

overshoe with an opera toe, two or three strands of blonde hair, two tortoise shell and one metallic hairpin. On the body was nothing but a wo man's knit union undersuit and over it

near on the ground The girl's family identified the girl's clothing and marks about her body. The girl was a social favorite in Green-

A telegraph operator at Greencastle, an acquaintance of Scott Jackson and of Pearl Bryan, had learned from Will Wood that Pearl Bryan had left home ostensibly to visit relatives in Indianapolis, but had gone to Cincinnati at Jackson's request. He told Sheriff Plumer about it, who telegraphed to Cincunati and ordered Jackson's ar-

also arrested on suspicion that he knew

something of the crime. Jackson is 28 and Walling 21.

Pearl Bryan and was the son of Rev. D. M Wood, presiding elder of the M. E. church of the Greencastle district. He introduced Jackson to the girl, induced her to go to Cincinnati at Jackson's request and saw her off for Cincinuati at the depot. He was placed under arrest, but later released, as there was no evidence connecting him

with the murder. He is 20 years old. Jackson denied that he had seen Pearl Bryan since his visit to Greencastle Jan. 2, but later said he had been with her in Cincipnati Jan. 28 and 29. He

her of her trouble. Walling said he had seen her Jan. 29

had disposed of her bloody clothing and their own bloody apparel. Each BIC DAMACES AWARDED. and their own bloody apparel. Each said the other had thrown her head into the river. Jackson's bloody coat was found in a sewer. He said Walling wore it. A pair of Walling's pants Governor Bradley Refuses to In- were found at the dental college, bloodspecked and muddy. Pearl Bryan's value was found at a saloon where

Jackson had left it. It was bloody inside, and Jackson said that Pearl Bryan's head might have been in it. Pearl Bryan's pocketbook and other property were found in Jackson's possession.

Later Pearl Bryan's hat and Scott Jackson's handkerchief were found together in the road near Newport. The night clerk of a hotel said that about 4 a. m. the night of the murder Walling engaged a room at the hotel,

without registering. All this testimony was submitted at the trial, which resulted in their conviction.

Perjured evidence was introduced to save the men, but it was proved to be perjury, the witnesses later contessing, and availed the defense nothing.

The defense tried to prove that the girl died of medicide administered for off. Experts testified that her head was cut off while she was alive, which was shown by the fact that the blood spurted on the leaves and ground where the body lay If she had been dead at the lense. time the blood would have been coagulated and would not have spurted Nothing has ever been found of the

head. Pearl Bryan's sister pleaded with Jackson and Walling to tell her where the head was, but each only ac-

cused the other. The men had a chance to leave the Newport jail, when other prisoners escaped, but refused.

GOV. BRADLEY'S ACTION

FRANKFORT, March 20 -- [By Associate

Gov Bradley had a talk with Judge son In fact, the governor at the time | Helm over the long distance telephone thought both men dead, as he had been When it was over he said "Judge Helm informed that they were to be hanged says Jackson simply stated that Walling is not guilty of murder. He thinks it At 10 10 the sheriff was directed to means nothing but an attempt to save hang Jackson and hold Walling for time I told him to tell Jackson to state further orders Jackson and Walling the circumstances showing that Walling were hanged together at 11 414 Both is not guilty of murder, and not to give declared there innocence. The crowd a mere opinion. I told him to tell the cheered loudly when the signal went up sheriff to go ahead with the execution of Jackson if he had a statement to make. Judge Helm, after coming from a tel- he could make it on the scaffold "In his elphone consultation with Gov Bradley, statement refusing to interfere in the

"The common law concerning the tered to her to perform an abortion. If this is true, she being quick with child, as shown by the evidence, the child was killed also Her death was caused by drugs deliberately administered, the effect of which clearly manifests an utter disregard for human life.

The confessions, however, are inconsistent and contradictory, utterly at war with every statement that each of them made on the witness stand It is urged that this should be overlooked, danger pending it may well be asked how much greater is the danger that is

speak talsely now. "These men have not only trifled with set at defiance the laws of God and

GLADSTONE ON CRETE.

England's grand old man, writing from Cannes, unsparingly exhibits the real situation in the East. After reviewing the events of recent years, leading up to the present conditions, he exclaims, "It is time to speak with freedom," and then

"At this moment two great states are under the government of two young men, one wholly without knowledge and experience and the other having only such knowledge and experience, in truth hmited enough, as to have excited astonishment and consternation when an inkling of them was given to the world. These, so far as their sentiments are known, are using their power in the concert to fight steadily against freedom. Why are we to have our government. pinned to their aprons? On the heels of this concert we have pledged for two years, and with all its pretensions of power it has worsened and has not bettered the situation.

"Surely it is time to shake on the incubus. Why should not Crete be autonomous, united with Greece's Yel it is Bosnia and Herzegovina, Greece, by ben Venero and Theodore Vives.

her bold action, has conferred a great service in Europe, and has made it im possible to falter with the question as we have faltered with the blood-stained question of Armenia. She has extricated it from the meshes of diplomacy. and has placed it on the order of the day for a definite solution. I remember no case in which so small a state has conferred so great a benefit?

Plucky little Greece may suffer for a time, but in the end will discover that her boldness has done more to restore her ancient prestige than all the internal development of a century

TIME TO SOW CLOVER SEED.

An Advocate For Early Sowing Gives Reasons For This Practice.

The unusual success that followed towing clover seed, early and late and under all conditions, will cause many to be lax and careless this spring. As a rule sowing is more apt to be too late than too early. It is too much the rule to sow to miss the freezes and take the chances against the drought, when it would be much better to make the greatest effort to escape the damaging results from drought. At least this is the opinion of an Ohio Farmer correspondent, who makes these statements:

It is the almost universal plan to sow with some grain crop, more commonly with wheat, sometimes with rye or oats. As a rule the results are uncertain if sown with the latter crop. If the oats are sown for a full crop, the shade will be too dense for the clover. It was demonstrated last year that it was not necessary for the clover to have a protecting crop. Only from the practice of sowing with other crops could have come the belief that a sheltering crop is necessary. Some years ago, working under the

belief that freezing was the greatest foe to success, we waited till we could harrow the wheat. This usually could not be done till in April. Sown before or after the harrow work we were almost sure to get a good catch. But we too often met with loss before the droughts of summer were past. With this kind of sowing we soon found that we had no assurance that we could continue a regular unbroken three year rotation. Fi nally we learned that under proper conditions of the soil it was possible to have almost universal success with early sowing. For 14 years we have made it a study to know these conditions. While our success has not been as complete as desirable, still the failure has not been such as to cause us to break our rotation.

Here in southern central Ohio we sow the last half of February or the first week in March, on wheat, of course. When it is sown at this time, we never expect to harrow before sowing. We aim to select a morning when the ground is honeycombed with frost. Usually on such a morning the ground will begin to thaw before noon. To get the work done while the soil is in the most desirable condition it must be done rapidly. The machine we use sows a breadth of 35 feet at a round.

The point aimed at by early sowing is to get the seed as thoroughly covered as possible. In this condition it will pass through short warm spells and not be sprouted. When well covered, it will not sprout till settled warm weather comes. Three years ago the hard March freeze destroyed a great deal of early sown clover. A good growth of wheat and rye was sufficient protection to ours to save us a fair stand, yet it would have been profitable to have given a light reseeding. But as this is the only time we have in our experience met disaster from early sowing we shall continue the practice. A second advantage from early sowing lies in the fact that the seed being covered, the roots are deeper, and consequently the plant stands drought better.

Sugar Beet Production.

There is a growing interest in sugar beets among our farmers, and there are many statements about sugar beet production, some of which ought to be taken with several grains of allowance. As The National Stockman says:

In the first place beets containing a profitable proportion of sugar cannot be produced on all soils. Further, if they could be there is no market for them unless a factory is at hand. A sugar factory is expensive, costing \$200,000 and upward. Unless capitalists can be induced to establish such factory there is no use in farmers undertaking to raise sugar beets as a money crop. It is all right to experiment, and, if conditions are favorable, to do everything possible to enlist capital in the enterprise. Such action might be of great benefit ultimately, but those who expect early returns from sugar beets in the absence of factories will be disappointed. Better devote the efforts at present to getting the factory than to raising the crop.

In the State Legislatures. Kansas has introduced a bill in the house of representatives to place the occupants of the penitentiary at work restate by building irrigation canals and requires the regulation of water already appropriated; Idaho is seeking some must be by sowing very thickly and cutmeans of protecting capital invested in ting when very green and somewhat imirrigation enterprises, and Texas is mature. Country Gentleman, authority working on a similar plan; California for the foregoing, advises those who deons phases of irrigation applicable to small area as a trial crop. that state, and so on throughout the list. Even Minnesota has taken up irrigation, and a bill is under consideration for presentation.—Irrigation Age.

Mulching Clover.

Nothing more certainly insures a stand of clover than a top dressing of stable manure, but this cannot always be obtained. A very light application of strawy manure on thin, light land is worth much to a seeding of any kind of could fill the committees without the grass or clover. When wheat straw is co-operation of senators from other abundant, it can be used with profit on thin land. Spread it even more thinly to the acre, and as a protection and clover. It is a help, but in nowise equal very marked, in value to stable manure as a mulch for young plants. Thus writes a contributor to Farm and Fireside.

IMPROVED BEEKEEPING. Advancement In Methods and Appliances

Within the last Half Century, In 1852 the movable comb hive was

riven to the public, and that was a great leap in advance. It allowed the beekeeper to examine minutely just what was going on in the hive, and in many cases to apply the remedy where there was trouble.

At one time honey was obtained by smothering the bees with brimstone, then cutting out the combs, selecting some of the best that contained nothing but honey, making a grand mash of the rest and straining out the honey, more or less flavored with bee bread and dead bees. As a great improvement boxes were put on top of the hive, allowing the honey to be taken away without killing the bees. Then the honey extractor was invent-

ed, by which the honey could be thrown from the combs, leaving the latter uninjured to be returned to the hive for refilling. Even if the comb was partly filled with eggs and partly developed bees, the honey could be thrown out without disturbing the baby bees. It is, however, better to extract honey only from those combs which contain no brood. Still later section boxes came on the stage, in which a shapely cake of honey took the place of the irregular combs to be found in the surplus boxes that held from 5 to 25 pounds. Separators were invented to force the bees to build their combs straight. Along with this came the use of comb foundation, for without foundation it would be a very difficult thing to get the bees to build straight combs in the sections. Not only was the invention of comb

help in the brood chamber. The frames could be filled with foundation having imprinted on it the base of cells just the right size for worker brood, making it impossible for the colony to rear a large up to the whites. So the girl was hurhorde of useless consumers in the shape Some think that the age of improvements in bee culture is about over, the summit having been reached. But a progressive apiarist, writing from Illinois to The National Stockman and

foundation a great aid in securing beau-

tiful surplus honey, but it was a great

Farmer, tells in addition to the foregoing that it is now confidently expected that instead of foundation having little more than the septum or middle wall, we will soon have comb as delicate as cells three-eighth inch deep or as deep as may be desired.

Potatoes In Cellars.

There are many dangers of injury to potatoes kept in cellars. That of being frozen is, when it happens, the worst, but it is always guarded against, so that no caution is needed about that. Much greater is the likelihood that the potatoes are kept too warm, and especially if they are piled in bins. Some warmth comes always from potatoes thus massed, and those in the bin will be untouched by frost even when a film of ice will form over water set in vessels Their only baggage, handled always by on the floor, or the potatoes left outside the squaws, consisted of blankets and the heap have been frozen. It is doubtless the warmth developed by sprouting plunder they desired to take along. The the potato that creates the warmth that bucks carried their rifles and two belts protects the mass as it slowly rises of cartridges each. Usually the Indians through it. When it is seen that potatoes had plenty of horses to ride, but they are beginning to sprout, they should be removed and the larger spronts be broken off. Those that are meant for seed ought never to be put in a mass, unless in a pit out of doors, and then they should be got out and exposed to air and light so soon as the weather begins to grow warm.—American Cultivator.

Getting Rid of Tree Stumps.

In many gardens where large trees blow down or fall in some other way tree stumps become a serious inconvenience, and the question often arises as to how best to remove them. A writer tells in Meehan's Monthly that he recently saw a case of this kind in which for a child. Sometimes they followed augur holes were being made and gun powder used to blow the huge stump into fragments. In many cases this is not a desirable practice. It is not difficult to get rid of the stump by first chopping off some of the long roots with an ax and then digging a deep hole near and with a lever rolling the stump into betray the route the party was taking. the hole, thus burying it. It is by no When pursuit was not hot after them means a costly way of getting rid of an and there was no danger in sight, Geexpensive trouble. Many a tough job may be lightened by a little forethought.

Japan Millets.

The Japanese millets which have been grown in this country are large and coarse. Several varieties, tested at the Massachusetts (Hatch) experiment station, grew to the height of 5 or 6 feet, and when ripe yielded at the rate claiming the far western portion of the of 28 to 91 bushels of seed and 2 to 61/2 tons of straw. AN APACHE CAPTIVE.

THE TERRIBLE EXPERIENCE OF LIT-TLE ANICETA CHAVEZ.

Captured by Geronimo's Band and Dragged About For Two Months -- Witnessed Much of the Savages' Bloody Work. Brutally Treated by the Squaws.

"During the last Apache war, ended ten years ago, there were two cases where white children were taken prisoners by the Indians and afterward were recaptured and restored to their friends," said a southwestern mining

"The first of the children captured and rescued in the last Apache war was Santiago McKin. The other was a little 10-year-old Mexican girl, Aniceta Chavez. On June 20, 1886, a detachment of Mexican troops surprised Chief Geronimo's band 40 miles southeast of Magdalena, in Sonora. So sudden was their attack that the Indians fled, scattering to cover and at last making their escape. As the soldiers searched the scene of the fight for the wounded and the plunder they came upon a little girl, ragged and barefeoted, hiding among the rocks. She was a child of Mexican blood, and when she was made aware that those

about her were of her own race and

friendly she told them her name and

"She was Aniceta Chavez, who had been adopted into the family of a ranchman named Peck, living near Calabasas, A. T. On the previous April 27, when Geronimo made his bloody raid into the Santa Cruz valley, he killed Mrs. Peck and her young child, but carried Aniceta into captivity. That he should do so surprising a thing as to spare her life was due probably to the fact that in case of ultimately being compelled to surrender to the United States troops he might secure better terms by having a prisoner to deliver ried along with her captors and compelled to witness the other murders that they committed after their slaughter at the Peck ranch. "It was hard work for her to keep up

with her captors, but her life depended on it. Several times that day the squaws would have killed her, but Geronimo would not suffer it, though he allowed them to abuse and beat her to their hearts' content. But she was only at the beginning of her troubles. From that made by the bees themselves, with the Santa Cruz valley the Indians swung back to the Sierra Madre, and there long journey through mountains and desert was a rough and cruel one. The Indians, pursued ceaselessly by troops on both sides of the Mexican border, traveled all day, never stopping for two nights in the same place. Their one meal a day, which they are at night, consisted usually of horseflesh, but if this were lacking and they were not too closely followed the band scattered, the bucks in search of small game and the women to gather snakes, lizards, grubs and edible roots and plants with which to make out a satisfying meal. papooses in baskets, together with any did their fighting on foot. They had excellent fieldglasses, captured from the It is of the very finest quality and is on whites, and these they used constantly. | the market fresh from the ground. He In traveling, one Indian rode in advance of the band, exploring for dangers ahead, while another, mounted on a specially good herse, rode far in the rear to signal to the others information fall was such an abundant one that it of any signs he might see of pursuit and ready at the right time to spur forward and warn them.

"The Indian bucks, while they took little notice of Aniceta, were not unkind to her, but to keep up with the party in its endless marching through a mountainous country was a fearful task trails and again traversed a trackless region, often climbing heights so steep that the Indians had to dismount and lead their horses. When traveling afoot, she was cautioned never to set her foot en soft soil, but only en rocks or grass. This was that her footprints might not ronimo would carry her on his horse. In their flight the Indians found time for considerable murdering and plundering of the whites. She found the squaws more bloodthirsty and cruel than the bucks, and they were ever eager to hack and mutilate the bodies of any white person whom the warriors had killed.

"Where the Indians traveled she had no idea, except that they kept almost altogether in the mountains. From the time wholly south of the Mexican border. It was the suddenness of the attack by the Mexican troops that saved the girl's life, for if the squaws had not been for the moment panic stricken they would have killed her to prevent her coming separated from them in the confusion, she remained in hiding while they fied. When found by the Mexicans, she was in good condition physically and mentally, except that she was worn by fatigne and exposure, and her face was swollen from the beatings of the squaws. Scon after her recapture, the Mexicans delivered her to the United States authorities, who took measures to restore her to her friends. I saw her scon after her return to Arizona-a brown faced, dark eyed child, handsome, as all American children are, and showing no signs of the hard experiences of At the experiment stations home grown her two menths' captivity with the

The following prices are being paid in the Massillon markets for grain and produce on this date March 22, 1897. GRAIN MARKET.

Wheat per bushel.....

Clover Seed.. Bran, per 100 lbs PRODUCE.

Choice Butter, per 1b.....

Hams, per 1b Shoulders per 1b.....

Stories of the Markets.

Local grocers no longer send to Cincinnati and elsewhere for lettuce. A man named Shisler at Beach City has built a hot house, and is now trying hard to supply the demand of Stark county. finds a market for every ounce of it.

Massillon people have not bought enough canned fruit this winter to fill one good sized order. The harvest last was a very unthrifty housewife indeed who did not fill her cellar with jars of apples, peaches and the rest.

The town is eating lots of fish these days. The demand for sturgeon at some of the stores is unprecedented. Great quantities of mackeral and herring are also sold During Lent almost everybody wants fish, and it seems they never wanted it so badly as now.

Clover Seed Scarce.

A nice thing to have on hand just now is clover seed. It will bring 4:50 a bushel easily at the present time, and if the demand increases there is no telling how high it may go. The cabbage that is on the market has all been shipped here from afar. The local growers were unable to preserve theirs on account of the unfavorable weather. The markets could scarcely be any duller than they are today. The demand for anything has been light enough. Good butter, however, will still sell readily.

Saturday Market Talk. This is the first day of spring, and the

sale of garden seed has been great. The first maple syrup and sugar are on the market and are cheaper now than

ever before at this time, especially the latter, which sells for 10 cents a pound. Everybody is ordering poultry for his

Sunday dinner. There is plenty on the market, so dealers are able to fill the demand.

Sheriff's Sale.

TARIFF HAS THE WAY.

Appropriation Bills Passed by the House.

REPUBLICAN PROGRAM ADOPTED.

The Framers Make a Change In the Wool Schedule Democrats Agree to Have Bailey Make he Minority Report-Senators Consider the Bill.

Washington, March 20.-The Republican leaders have secured in the house the adontion of a special order fixing the limits of the tariff debate, the regular appropriation bills, which failed to become laws at the last session were passed and sent to the senate, so that, as Mr. Cannon remarked, all the driftwood of the last congress will be about \$2.05 for mesabic ores, but until swept away before the struggle over the question has been settled many imthe tariff begins. The garleries were thronged and there was hardly a vacant sen on the floor. At times partisan fee ing ran high and the hall echoed the cheers of the majority of the opposition as their respective spokesmen made effective points. There were several squabbles among the Democratic leaders which afforded much amusement to the majority. Both Mr. Bland, the silver champion, and Mr. Holman, "the watchdog of the treasury," appeared in their old-time roles.

Mr. Bailey of Texas, who made his debut as the leader of the minority, was favorably received by his side, and anwere domestic, whereas, the largest favorably received by his side, and annonnced it to be the policy of the minority not to delay the passage of the tariff bill. Mr. Dingley, the floor leader of the majority, recalled the fact that a dire prophecy of the result of the Mc-Kinley bill had been made by Secretary Carlisle, then the leader of the minority, on the occasion of the passage of the McKinley law. The people, he said, had listened to the siren's but their experience during the last four years had made them wiser. A special order was adopted limiting the tariff debate accoroing to the plan heretofore outlined. The rule was carried by a strict party vote-179 to 132-all the opposition save Mr. Howard (Pop., Ala.) voting

A new paragraph has been added to the wool schedule of the tariff bill by the Republicans members of the ways and means committee as follows: "Oriental, Berlin and similar rugs and mats and carpets, woven whole for rooms, valued at not less than 30 cents per square yard, 15 cents per square yard and 20 per cent advalorem; valued at more than 30 and not more than 60 cents per square yard, 30 cents and 20 per cent; valued at more than 60 cents and not more than \$1 per square yard, 40 cents and 20 per cent; valued at more than \$i and not more than \$2. 80 cents and 25 per cent; more than \$2 per square yard. \$1.25 and 30 per cent." The Democratic members of the ways

and means committee have held a conference on the question of preparing the minority report on the tariff bill After a discussion, in which there was much

The Republican members of the finance committee of the senate have commenced the informal examination of the tariff bill. They have decided that no hearings will be granted, but that careful attention will be given to printed or typewritten briefs filed with the finance committee relative to proposed changes made by the house bill, or other changes of existing customs laws. Such briefs, they say, should refer to specific paragraphs.

The Republican members will sit as as sub-committee and they hope that Senator Jones of Nevaoa (Silver Republican) will act with them. They will not hold their meetings at the capitol, but will make an effort to maintain strict priva y in their work. The prediction is treely made that their deliberations will result in many important changes and that it will be a very different measure when they finish it from what it now it. The schedules of the bill are generally criticised by senators as toe high.

One of the spec fic objections made is the action of the nouse committee in removing many articles of raw material from the tree list and making them dutiable without reference to the rates on other articles effected, a change which it is declared has resulted in many instances in making the rate on the raw material higher than that on the manufactured product.

Chairman Dingley's report on the new tariff bill follows largely the lines of the explanatory statement on the bill made by Mr. Ding ev and printed in these dispatches Tuesday.

DEMAND OF THE DAUNTLESS. The Cabinet Considers the Application

For Clearance to Cuba.

WASHINGTON, March 20.-What action the secretary of the treasury will take with regard to the request of the captain of the Dauntless for clearance from the port of Jacksonville, Fia., of the governor to appoint a senator. giving a port in Cuba as her destina- The memorial, like Mr. Addicks' petition, has not yet been determined. It is believed, however, that the questions involved was discussed at a cabinet meeting and a conclusion reached.

The opinion of the attorney general was requested as to the granting of the revenue questions and for an increase request of the Danntless and his reply has been received. It is not, however, mittee. an opinion. It reviews briefly the status of the Danntless and calls attention to the action which ner captain recently brought against the government. The attorney general, upon the request of the president or the head of a department, gives his opinion upon questions of law, but he does not advise as to what action should be taken where the matter is not a question of law and clearly within the discretion of the officer seeking the opinion.

The appli ation of the Dauntless is regarded as a case in point. The secretary of the treasury, it is stated, has the undoubted right to give her clearance or withhold it. if, within his opinion, the required oath as to destination and her intention not to violate the neutrality laws is not given in good faith. It seems certain that the policy of the ad ministration will be to enfore rightly mayor of Detroit. Such is the mandate the law against filibustering extent. of the Michigan supreme court, which tions, but whether the government will orders a special election for mayor go further than that remains to be seen. April 5.

DUN'S REVIEW OF TRADE.

Business Steadily Increasing, Yet is Dis-

New York, March 20.-R. G. Dun & Co,'s Weekly Review of Trade, issued today, says: Though steadily increasing, business is still much below its volume in former years of prosperity and many express disappointment. Yet there is some gain every week. with more hands at work and more mills in operation, and the sure result, large purchases for consumption, canuot be long delayed. In some branches it is felt already; there is larger distribution of finished products and the demand for commercial loans has sharply increased, and especially in drygoods

and the iron and steel branches. The progress of the iron and steel industry is hindered by uncertainty regarding the cost of lake ore for the coming year, though the reported adjournment of producers' meeting is interpreted as evidence that an agreement will be ultimately reached. It is reported that Norris ore at \$2.75 will be taken as the basis, which would imply portant transactions are deferred. While there is no great activity in finished products the demand steadily increases. Contracts for several great buildings at Chicago are pending, and for a good many bridges and other railroad works, and the demand for wire nails and for wire does not abate, nor the demand for black sheets required in

tin plate manufacture. The buying of wool, mainly of a speculative character in expectation of new duties, continues remarkably large. Sales at the three chief markets for the past week were 10,891,900 pounds, and for three weeks have been 28,795,800 transactions in any previous year at this season were 17,105,876 pounds in the corresponding weeks of 1892, of which 11,886,626 pounds were domestic. No great increase has yet appeared in the demand for goods, although a few more mills have found enough orders to start, perhaps, in part, anticipating a future demand. The expectation of new duties does not yet influence the goods markets, as might be expected.

The demand for wheat has not given much help to speculation. Atlantic exports have been only 1,263,390 bushels against 1,199,335 bushels, flour included, for the corresponding week last year, while western receipts have been only 1,397,346 bushels, against 2,416,089 bushels last year. Accounts regarding the coming crop have been less favorable this week and the price has advanced 1% cents. The exports of corn continue heavy, 4,543,705 bushels for the week and quotations have advanced seven-eighths.

Failures for the week have been 216 in the United States, against 261 last year, and 50 in Canada, against 49 last

Pingree Ousted as Mayor.

Lansing, Mich., March 20. - Governor Pingree is ousted from the office of

THE LEVEES TOO LOW.

Flooded Mississippi Threatens to Go Over Them.

THERE IS NO HOPE OF CESSATION.

The Upper Valleys Are Flooded and Heavy Rains Prevail-The Levee Cut Near Caruthersville, Mo .- More Lives Lost-Work of Rescue.

Memphis, March 20.-Two negroes have lost their lives as a result of the great flood, which engulfs hundreds of acres of land in the Arkansas bottoms. The two men were drowned in Fifteen Mile bayou, near Marion, Ark. There is no cessation in the rise of the river. It is rising at all points above and below. Heavy rains continue.

At Marked Tree, Ark., on the St. Francis river, there has been a deplorable rise, because this river swells the great volume of water in the Mississippi where conditions are already so distressing.

The gloomiest feature of the distressing conditions is the fact that there is little or no hope of the abatement of the high water within the near tutre because of floods reported in the upper vallevs.

The most alarming reports concerning the condition of the levees above and below memphis have been in circulation in Memphis, but they have particular reference to the levees below this point and even below Heiena. The levees are in most places built to extend three or four feet above the highest water mark in the locality where they are constructed. It seems now that this allowance of altitude has about been consumed by the rising water. Up to this time the people have exerted their utmost strength to solidify and preserve the levees, believing that by careful watching and by applying remedial measures whenever there was a prospect of a break, disaster could be averted. But reports from down the river indicate that hope has been lost in many places.

There is very reliable information to the effect that at Modoc, Avenue, Hugheys and other points below Helena the water has gone over the levee, and the levees being in such a mushy condition from the rains it is not thought possible to protect them much longer from the ever rising flood. The people living behind the dikes in the localities mentioned are already flying for their lives. The hundreds of men who had been at work watching the levees have about all been taken away and their labor will be utilized in saving the lives of other people.

There is positive information that the levee constructed under the direction of the St. Francis levee board near Caruthersville, Mo., has been cut, and the belief is prevalent in that locality that the work was done by persons living on the Tennessee side, who hoped by making an opening for the flood on the Arkansas side to decrease the flood and thus save the property on the Tennes-

Hundreds of refugees have been landed here by the relief steamers and are being cared for by the relief committee.

A report is current that of the levee having broken at Hill House, Miss., flooding the fine farms in that locality.

A Flood at Fondulac.

For Dr Lac, Wis, March 20.-Haif of this city is under water. Both branches of the Fon du Lac river are gorged and water is pouring over the banks in floods and covers the territory on either side of the river for blocks.

DR. SWALLOW'S TRIAL.

A Denial of His Charges by the Different Witnesses.

HARRISBURG, March 20.-Dr. S. C. Swallow is on trial in the criminal court on the charge of libel, brought by Representative W. F. Stewart on behalf of himself and the soldiers' orphans' school commission. The usual big crowd was in attendance, but nothing sensational developed. The alleged libel was printed in the Pennsylvania Methodist, of which the defendant is editor and publisher. He made the charge that the "commission paid eightfold more for articles than others could

buy them for." A good part of the session was consumed by the detense in endeavoring to quash the indictment. Tms failed, and then there was a long fight in get-

ting a jury. The witnesses all denied charges made by The Methodist. They acscribed how supplies were purchased for the schools, claiming that everything was gotten at the lowest market prices. Captain Boyer has done most of the buying since the commission was organized in 1889. He said that groceries were gotten from the leading grocers of Pittsburg, Harrisburg and Philadelphia. The perishable goods are purchased by the superintendents of the school. Captain Boyer said tab was kept upon them, and they were compelled to make monthly reports of everything purchased and the price

Rev. J. A. Waters of Uniontown, James E. Matthews of Harford, and J. M. Clark of the Scotland school, were examined They all denied the charges, saying that they bought goods in the open market and for the lowest prices.

To Stop Ir zefight Pictures.

SPRINGED LD, Ill., March 20 - Representative W. E. Lamont of Chicago has introduced a bill into the legislature, with an emergency clause at ached. which will prohibit, if it becomes a law, the reproduction of pictures or prizefights and fixes a severe penalty for violating it.

Lamereaux Has Resigned.

WASHINGTON, March 20.-The president has accepted the resignation of Silas W. Lamoreaux as commissioner of the general land office. It is onite robable that ex-Congressman Binger Hermann of Oregon will be apported to the vacan. y.

Three Friends Sailed For Cubu

TAMPA, Fla., March 20.-The steamer Three Friends has sailed for Cuba. She takes a large load of ammunition, dynamite and rifles, and a few heavy

ANCIENT WATER HEATERS.

People Two Thousand Years Ago Had Some Practical Conveniences.

In two of the museums of old Roman antiquities at Naples there are several water heaters, which indicate that the principle of the water tube, the crowning feature of medern boilers, was fully understood and appreciated some 2,000 years ago Mr. W. T. Bonner of Cininnati has been investigating these acaters and found them to be as interesting as they are beautiful. One of them consists of an outer shell 12 inches in diameter and nearly 17 inches high, surmounted by a somewhat hemispherically shaped top. Inside this shell is an internal clyinder, also having a hemispherical tep, which is 10 inches in diameter and 12 inches high. The two shells are connected at the bottom by a rim, like the mud ring of a locomotive firebox, and the space between them was filled with water. The grate was fermed of seven tubes made from sheet brenze, rolled and soldered or brazed. These tubes open at both ends into the bottom of the space between the shells, thus ferming a water tube grate for the fuel to rest upon.

Charcoal was probably used with this heater and was placed on the grate through an opening 4.8 inches high and 4 inches wide, closed by a beautifully decorated door. The gases from the fire escaped into the outer air through three small openings formed by tubes crossing from the inner to the outer shell alout 5.6 inches above the grate. The whole apparatus was raised about 12 inches on a tripod so as to allow air to reach the fuel. In another boiler of somewhat the same type the outer shell has the form of an urn, while the inner shell rises from a water tube grate to an opening in the side. It is 12 inches in diameter at the widest part, 17.6 inches high and supported on a tripod about 4 inches high. Its general shape is much like that of the silver cream pitchers known as the Paul Revere patterns, although, of course, it is much larger and has a top closed by a lid. It has been suggested that these utensils may have served at some time to heat wine as well as water, which suggestion appears reasonable, as many historians state that the Pompeiians made great use of hot drinks. It may be that they were found in one of the termpodi or cafes, of which there were several in Pompeii —Boston Transcript.

OUTWITTING AN EDITOR.

An Exciting Political Scheme In Which McCullagh Figured.

When David R. Francis was a candidate for governor of Missouri, his friends succeeded in using The Globe-Democrat to further his chances of election. Editor McCullagh had turned on 'Our Dave," as Mr. Francis is known in St. Louis, with his short paragraphs with telling effect, and Francis' friends got together and concocted a scheme to offset the editorial work of the paper. They wrote out a display advertisement, and at a late hour of the Saturday morning manediately preceding the election of 1888 took it to the counting room of The Globe-Democrat. The clerk on duty gave the copy a casual looking over and without a word accepted it. It occupied a full page, and at length and in glowing terms set forth the 'great business capacity and emment qualifications of Mr. Francis to occupy the gubernatorial chair of Missouri.'

That advertisement caused the biggest row ever witnessed in a newspaper office in St. Louis. When Editor Me-Cullagh found what had been done, he raged and stormed for a week. The fast mail had distributed the paper all over Missouri before McCullagh had his attention called to it. He left his quarters at the Southern hotel on a trot. Reaching the corner of Fourth and Pine streets, he found the streets and the office of The Globe-Democrat jammed with people, who were clamoring to step their subscriptions. McCullagh had filled a column on the editorial page with "squibs" strongly opposing Francis and advocating the Republican nomince, but the big display of Francis' friends was the first thing seen on open-

ing the paper. Mr. McCullugh at once issued an extra, in which he deprecated the oversight by which the advertisement had found its way into the paper, but it was some time before The Globe-Demecrat office recovered its equilibrium.— St. Louis Letter in Chicago Record.

What Manhattan Island Was.

Never say Manhattan Island when you mean the island of Manhattan. The briefer term was properly applied in such a way that now it cannot be applied at all. The place that bore it is no longer discernible. Manhattan Island was a knoll about an acre in extent which lay Lear Corlears Hook, surrounded by marshes and partly submerged by high tides. Later on it became the center of a place which did us noble service, but again has been oblit erated, save ter the lingering nickname of Drydeck Village. Here were built most of our ships in the days when no one could build them quite as well as we,-Mrs. Schuyler Van Rensselaer in Century.

Shooting Tigers In India Is Exciting Sport.

ENCOUNTER WITH A BUFFALO.

Indian Panthers Are Ugly Customers, and Their Pelts Are Not Lightly Gained. Colonel Ward's Adventures In the Jungle-An Interesting Dispute With a Tiger.

Relating some anecdotes of experiences while shooting in India, Colonel H. Ward mys in the Badminton Magazine: I found the footprints-perfectly fresh-

of a large tiger, which had evidently been only just disturbed, probably by us. Folthe tiger, about 50 yards in front of me, walking slowly along among the bamboos. He neither saw nor heard me and scemed to suspect nothing. I followed silently until I saw him dip into another small ravine. Then I ran back and sent the men round to drive him toward me. There was no large tree available; so I lay down on a flat rock, with a sloping bank to my left, and on my right a clear space about eight yards wide to the side of the hill, which rose in a perfectly straight scarp. I hoped the tiger would come to the left below me. He did not, and I watched him from 60 yards off walk calmly toward me on my

He would have passed within six feet of me had I left him alone. But every moment I thought he would hear the beating of my heart. So, when eight or ten yards off, I fired, and as the smoke cleared I saw the brute's jaws apparently close to the muzzle of my rifle. To pull the trigger. drop the rifle, turn heels over head down the bank and spring up the nearest small tree was the work of a few seconds, and there I clung on recovering my breath and wondering whether I was alive, until a Bhil from above shouted that the tiger was dead. He was half on the rock, where I had been, shot through the heart, and the hair on his face burned with the flash of the second barrel. He was a magnificent old male, one of the largest I have killed.

I met a charging panther late one evening when returning to camp. Walking through low scrub jungle, I suddenly realized that in the fork of a tree about ten feet from the ground a panther was crouched, looking at me. As his eye; There were 251 in Brooklyn, 40 in Long caught mine he bounded down before I! Island City and 26 in Staten Island.

2 waited for the shot, but none came, and th a few minutes a voice called out: "Stop the heat! The tiger has gone!" I soon found that the tiger had walked past, about 15 yards from my friend's chair, and then jumped a small water course behind. Both he and his orderly were quietly asleep. We changed our position and beat the hill the tiger had gone into. This time he came to me and was killed.

Once while traveling alone near the Jonk river I was met by an old Gond shikari who had been out a good deal with me in better times. He pointed silenfly to the footprint of a huge bull buffalo in the middle of my rath, evidently quite fresh. The track led parallel to my road. So I desmounted, took the rifle and signed to the old man to lead on. After following for half a mile we saw a large bull buffalo with only one horn. He, too, saw and heard us, and began pawing and tossing up the ground, uttering a low, deep bellow. The old Gond was by this time greveling at my feet and said that the bull had killed three men within the last lowing very cautiously, I presently saw month or two I could not get a broadside shot, and the distance was too great for certainty. Time pressed, as I had still many miles to go. So I suggested to my old friend that he should draw the bull by running across the small glade where we were standing and climbing up a tree on the other side, which had branches hanging conveniently low down.

He said it was quite impossible and meant certain death to him. I then said that we must both retire together; that, too, was certain acath-for one, or both. However, he presently saw that to climb the tree was the lesser of the two evils, as I should check the bull's charge. So, mustering his courage and telling me with his last words that he was going to his death, he ran across yelling. He had not 20 yards to go, while the bull had at least 80. But the brute had evidently been waiting for some one to run, and came out with a rush at the first shout. The old man was up his tree like a monkey well before the bull passed me at a gallop, about eight yards off. I shot him clean through the heart, but the impetus of his rush carried him on for about 100 yards, crashing through the jungle like a traction engine let loose, till he fell dead against a tall tree, which quivered to the very top. We were both glad to be over that business. An old solitary bull is a nasty beast. Most builaloes run away if they can or only charge when hit. A solitary animal is not to be trusted and oceasionally attacks any one he meets.

Statistics of Burglary.

There were 2.015 burglaries and housebreakings commuted in London in 1895, 997 in Paris and 506 in New York city.

THE MAN OR THE TIGER?

could raise the rife, and I only got a snap shot as he went off, hitting him, but it was too dark to see to follow. In the fork of the tree were the remains of a young nylghau, which evidently the panther had killed carly in the day, caten what he could and then dragged the rest up the tree, so as to be out of the way of vultures

and jackals. The next morning I took up the blood trail, and about 50 yards off found the panther under a bush not big enough to hide a hare, yet neither I nor my men had seen him until we were all but on him. One step more, and he must have sprung on one of us, when my lucky shot caught

him between the eyes. Parthers are nasty, uncertain brutes and can hide in any cover. As a rule, they will, the stranger mer Mrs. Holmes, appearing attack you; but, while I have seen some; suddenly from she knew not where, swiftcharge home without provocation, I have

seen an occasional one run like a beaten deg Nothing would make him fight. Twice I have seen them, when wounded, charge almost within springing distance and then stop. One of these two sat down on his haunches within five yards of me and reared while I reloaded. He had been seen in a cave at the top of a small hill, and the men said he could be shot as he lay | Colonel C. watched the er trance of the cave while I climbed the hill and then saw the panther through a cleft shelv ing in the center, so that I could not fire without hitting the rock. We tried to tempt the least out by shaking a turban in front of the mouth of the cave. All he would do was to put out one fore leg. I sent a bullet through this, hoping to stop him with the second barrel as he went off, but the face was too good, and I missed him; so did Colonel C from below I was net quite sure which was the most dangerors, for the cole nel's I ullets whizzed about pretty freely among the rocks, but after dealy appeared on the top of the rock, 20 yards off, and came straight for me. 1 yards distant the patther sat down and round up at I shot him dead.

On the other occasion, when the panther charged, the certridge januard, and I could reffered it in her out. He aid bot, to the while, and her mysterious admire? however come fonc or wait till I could get anoth rapic, but in alle off with a broken shoulder, and I never saw him a con. Panthers slink away and hide so easily that many e-care without being fired at. I have killed many more tigers than panthers, though the latter are certainly the more numerous of the two.

One morning a cov was killed close by. Beaters were collected and the guns were posted, most of us in trees. Colenel B. said it was too much trouble to climb a tree, so he seated himself in an ordinary chair on the ground with a sepoy by him. The day was hot. There was some little delay. But directly the beat began I heard the footsteps of a heavy animal between myself and Colonel B., and then a jump.

SHE WAS KISSED INCOG.

The Mysterious Stranger Who Saluted Mrs Holmes Was a Chinaman. Mrs. B. H. Holmes, a laundress at the Baldwin hotel, in San Francisco, recently

had a strange experience. She goes to her work about 6 o'clock in the morning. Once, at the corner of Sixth and Market streets, a man appeared suddealy, and, approaching her, imprinted a kiss on her cheek, then disappeared down

black, his coat collar was turned up and his hat rulled down to hide his features. Upon the following morning the same thing happened. Morring after morning

HAUNTED BY THEIR VICTIM.

Remarkable Crime of Two Unsophisticated as a Model-A Graphic Story of Their

Strange Adventures. In Lafayette, La., two rosy cheeked French peasant boys are under sentence of death. They are Ernest and Alexis Blanc, brothers, and they murdered Martin Be-

Of tender years and amiable disposition, living far from the wild rush of the world in that Acadia which Longfellow pictured in "Evangeline," these boys deliberately planned one of the most brutal murders ever committed and carried out every detail. They secured the money that they sought and traveled through many countries. But that irresistible desire that draws every murderer back to the scene of his crime followed them in all their wanderings and led them back to be captured just two months ago.

gnaud, an old storekeeper, a year ago.

The story can be briefly told. Ernest Blanc, the murderer proper, is a

stout, well knit youth of 20 summers. He was born in Paris of parents belonging to the middle class. At the age of 7 he was bereft of his father, and the care of himself and his brother Alexis devolved on the mother, who, by close economies, succeeded in keeping the boys at school. The two boys were inseparable. They had no taste for games and frolies of the young Parisians of their class. They lived in a dreamland world of romance and adventure. * In the parks, under the trees, and in their room by candlelight they lived through the romances of Alexandre Dumas. When Mme. Blanc died, the boys came

to America. They went to Louisiana and found employment at modest wages on the plantation of Colonel Drosin Boudreaux in Lafayette parish. They seemed happy, and their quiet manners made them many friends. They also seemed contented until one eventful day the life of Jesse James fell into their hands. "We borrowed it from Mr. Charles

Breaux, the justice of the peace of Lafa-'said Ernest, the elder, when he was seen in prison. "This book we read and reread until we had mastered every line of We saw that we could never improve our fortunes in the regular workaday round, and we concluded to emulate Jesse James and acquire fortune and fame in the same way that did that famous outlaw. "Three weeks before the murder of the

old man we finished the book. From that time until we had committed the deed we spent all our spare time in laying our plans. We bought a pair of Smith & Wesson revolvers, and in the plantation blacksmith shop we found a three sided file. which, with the assistance of a grindstone, we smoothed and sharpened. They had not hate for any one, no specif-

ic person to murder. But after determining to kill some one they cast about for a

ERNEST BLANC. victim, and finally settled upon the old

bachelor storekeeper, universally esteemed and beloved, and the man above all others who had been their friend Ernest, in continuing his confession, said: "Two mights massed before the oppor-

tunity came. We went to the store at 10 o'clock at night, but it was closed, and we went to the saloon next door, kept by his brother, and found the old man in there with a number of friends. We crept into the weeds and waited. One by one the crowd melted away, until only the two brothers stood laughing and chatting. Then the two old men bade each other an affectionate good night, and Martin Begnaud went to his store. Now was our chance. We wished to wait until he had entered the door and then rush after him. But he walked quickly, slammed the door after him and bolted it. We sucked in our breath. We thought our chance was gone.

"My brother proposed that we rap on the door and ask for tobacco. No sooner said than done. " 'Who's there' asked the old man. 'It

is us, Alexis and Ernest Blanc,' we replied. 'We saw you just go in, and we thought we would ask you to open long enough to give us some tobacco.' 'Certainly,' replied the old man, and he threw open the door, laughing and bidding us walk in. "The tobacco was right behind the

counter where he could reach for it mechanically behind his back while talking to us. We had no chance to get at him. Ah, how my heart beat! He chatted with us merrily, and then declared jocosely that he would put us out that he might close up the store and go to bed. All three together we walked out to the door. As we passed out my brother and I looked at each other, and we saw the reproach 'coward' on each other's face. With an effort I pulled myself together. 'Ah, how foolish,' I said. 'I knew

there was something I had forgotten. Why, we will go to bed supperless if you do not let us have a box of sardines.' The old man was good natured, 'Enter again,' he said, and you may buy all the sardines you wish. 'Even then our hearts failed us. I saw

my brother make several starts and then stand undecided. My own heart beat, and felt like one palsied. My God, how could I talk so easily! Still fumbling, still weak, as we tried to persuade ourselves without opportunity, we walked nervously round while the old man wrapped up the tin box and chattered on.

"It was here that my brother discovered some rattraps outside of the counter. He asked about them, how they were used and what was their cost. The old man. glad to explain them, came from behind the counter, and as he stood rattling the traps together my brother and I looked at each other and we both saw that the other was resolved. In a flash, quick and sure are all enrolled in the fire department.

we covered him with our pistols and the My God, how his expression changed in the lamplight! We told him at peril of his life to make no outery, and No Rest For the Murderers of there was that in our faces which let him know we were in carnest.

"'What is it you wish?' he said in a thin voice, 'Your money quick, your money! Open the safe!' I commanded. "At that his face grew very white and

helpless and we led him over to the safe. It was five minutes-God, it seemed five years—before he opened it. He fumbled. he could not use his hands; but all the French Youths Who Took Jesse James time we kept him covered, listening to ourselves breathe. At last the door swung open and we were sure the sound was heard all over the village. While my brother stood with the pistol glinting in the old man's face I went hurriedly through the safe. A pile of greenbacks, \$700 when we came to count them up,

came to light. Then my eye lit upon two little drawers, and I divined that they contained money. I ran to where my brother stood over the old nun. "The keys of the drawers!" I hissed.

" 'There is nothing in the drawers but valuable papers,' said the old man, and I could tell by the impatient tone he tried to assume that he lied. Without a word, we tied his hands be-

hind him. Then we led the old man back to the bedroom. There we bound him hand and foot, tore a strip of rag and bound it over his eyes, then tied a pocket handkerchief over his mouth so tightly that he groaned. "Where are the keys?" I said when he

could not see. 'In a little department at the right,' he moaned through the bandage. We knew that he spoke the truth. My

brother ran into the store. I remained on guard over the old man. I could hear the key rattle in the lock, then the jingle of money. My brother had found more mon-God, how it jingled! Then he came running back. His eyes were blazing when he said: 'There is too much money! I can-

not carry it away. It is metal."

My hand twitched. I touched the dagger, and it burned me. Then I closed my eyes, drew out the keen, strong, three edged blade and held it firmly. The old man was moaning under the red pocket handkerchief. Heaven help me! I aimed for his heart, and as the blade went in deep and smooth the old man groaned and rolled over on his side.

'There must be no danger. I plunged the blade again. It went in smoother, and I grew strong. Again and again, quickly, smoothly, I stabbed him in the neck, in the chest, till I was sure he was dead, he lay so quiet

"We never glanced back. We fled from the room. We reached the safe. There was \$1,100 in gold and \$1,200 in silver, as we found out. We put the money in a box. dug a deep hole, covered it over with earth and then laid the grass back so that no one would ever dream there was money buried there. We waited until two men had been arrested on suspicion, then we gave some pretext and went away." The boys went to New Orleans, and then

began those travels so full of remorse and the lashings of conscience. They went from New Orleans to Atlanta, thence to New York, then across to England. They went to Paris next, back again to London, to New York, then to San Francisco. In California they found their money was nearly exhausted, and they separated. Alexis, the younger, went to St. Louis, and Ernest, the elder, to New York. But being separated, they found, was worse than being together, and they rejoined each other in St. Louis, where, of the \$3,000 out of the murdered man's safe, they had but \$10 left. From that time on they became tramps, footsore and weary, sometimes stealing a ride on a train, sometimes on a farmer's wagon, sometimes pledding many weary miles afoot. They reached El Paso, Tex. From El Paso they worked their way to New Orleans, and, feeling they had not been suspected, decided to return to the scene of the murder. They told conflicting stories as to their

adventures and were arrested on suspicion. At first they denied their guilt, then I roke down and seemed happy after a complete

confession. They told how they had seen all the world's gleries, enjoyed all the

world's pleasures with their blood stained gold, but wherever they went, Alexis said, in Paris or Landon or San Francisco, the other (he would speak of his victim only as 'the other") was always with them. As at the Persian feast, a grinning skeleton was ever by their sides. The dead man traveled around the world with them. The money went, as all such ill gotten gold goes, ratidly, and then came poverty and want to tantalize them. When the last dollar was spent, they tramped back to the scene

Nobody Liable For Jury Duty.

of their crime to meet their punishment.

MISJUDGED HIS COMPANION. Queer Experience of a Traveler on a Lake

Steamer.

"Speaking of misjudging people," temarked the young man who has money and can take pleasure trips whenever he feels like it, "I had a peculiar experience when I took the steamer trip up the lakes. I was little late in applying for a berth, and the clerk informed me that every stateroom was occupied, and he would have to give me a berth in the same stateroom with another person. I didn't particularly like the idea, but it was the best I could do, and, being very tired, I turned in. I saw nothing of my roommate, and, he having first choice of berths, and presuming that he would choose the lower one, I climbed up above.

"I wondered what sort of a man he

would prove to be, and to be on the safe side I took my gold watch and pocketbook and placed them carefully under my pillow. I tried to stay awake until he came in, but the motion of the boat lulled me to sleep in spite of myself, and I didn't wake up until morning. The other person had turned in without disturbing me. I heard him stirring around in the lower berth. Cautiously I slipped my hand under the pillow. Both my pocketbook and watch were gone. There was no denying it. I searched the berth carefully and quietly. There could be no mistake. My handsome timepiece and several hundred dollars in bills were gone. I lay still for a long time, wondering what I would do. Perhaps he had hurled the plunder into the hands of a confederate. I felt pretty blue. Anyway, I would report the matter to the captain. I sat up in my berth with sudden resolve. A pleasant faced young man was sitting, fully dressed, on the lower berth. "'T've been waiting for you to wake

Mrs. Pinkham, and conduct their habits up,' he said. 'Do these things belong to you?' He was holding up my purse and "'Yes, sir, they do,' I answered se-

"'Well, the blame things plumped

down on me this morning about an hour before I wanted to wake up. The wallet struck me bain on the end of the nose and the watch nearly knocked my front teeth out. I was never so startled in my "I looked sheepish, I suppose; I cer-

tainly felt so, for, turning the pillow down, I found that the springs were of woven wire and lacked several inches of filling in the space at the head of the berth. My property had simply slid through and dropped upon the face of my startled stateroom companion. He took matters very good naturedly, and we got to be good friends before we got to Duluth. He was a wealthy young Important Cincionati Case to Be Heard Englishman taking his first trip through our western country, looking for investments, and I found him a very companionable fellow."-New York Tribune.

A BEAR IN A CAVE

Two Indians Went In by the Light of a Torch and Killed the Game. Robert H. Davis tells in Gameland

how two buck Indians of the northwestern ceast tribes went into a bear's den grizzly bear.

A young law student got sight of the bear one day while he was still hunting. While trying to approach it the hunter alarmed the bear, and it ran to a 1,000 foot chiff and took refuge in a hole there. The student climbed up 100 yards on the face of the cliff and started rocks down about the hole, thinking to drive the bear out, but the bear would not start. Then he went to a nearby Indian camp and got Trinity Dick and a Pitt river Ingian, who said they would go with the man after the bear if he would let them take the rifle. The student let Trinity Dick take the rate and degree another for the Fitt river In-

"I waited outside," the student told Davis, "while the Indians went into the cave with a torch. I listened for a long time, then I heard the dull boom of two guns away back in the cave somewhere. Then all was still again for some time, After a bit Trinity Dick came out and waved his hand to me, then went back in. I followed and quickly came to the bear, which was already loosing its hide at the knife point of the Pitt river In-"The cave was deep, with many arms.

The Indians had tellowed the main eave, disputing with each other as to who should go first. Trinity Dick, Lengthe eldest, got the place of henor, while the other followed, holding the torch high aloft. The Lear was not in the main cave, and they went to the end without coming upon it. On their way out, however, the men were confronted by the bear at a distance of 20 feet. Trinity Dick told his companion to hold the torch steady so that the sights could be seen plainly. When the shot was fired, the bear pitched forward, and then a second bullet was fired into it. The Indians then turned and ran, loading their guns as they did so. I ut the bear never moved again." Pleasant Exercise. Stern Father-What were those pecul-

iar noises I heard down here last night?
